Educational Resources for PS 88 Families

FAMILY FUN SITES

abcya.com: K-5th Grade

ABCya focuses heavily on building math, reading, and writing skills, but it also covers some additional topics as well as holiday themes. All of the games and apps were approved by certified teachers.

Funbrain.com: K-8th Grade

Funbrain.com Focuses on improving math and reading skills, Funbrain features books and comics as well as arcades filled with interactive games. This site has fun math games, videos and books for all ages. Funbrain makes learning fun.

FAMILY FUN SITES

nd
Starfall.com: Pre-K-2 Grade

Starfall.com provides free interactive materials and games that help kids practice reading and build their phonemic awareness.

The Online Games section of the PBS website offers not only games but also printable activities such as coloring pages. These resources attract and engage young students because they feature popular PBS characters.

FAMILY FUN SITES

Game Classroom: K-6th Grade

Game Classroom has compiled games, lessons, videos, and worksheets from a variety of reputable sites. The site also offers helpful articles and newsletters to keep parents informed.

Light Up Your Brain: K-8th Grade

The brainteaser games and audio stories featured on Light Up Your Brain help students hone their problem-solving, reading, color-matching, math, and fine motor skills. For example, your child can test his or her understanding of physics in “Successful Experiment” by using different-sized balls to move an object to a designated spot.

FAMILY FUN SITES

Prongo: K-8th Grade

Prongo offers free games, e-cards, jokes, downloads, brainteasers, and links for most major academic subjects. You can also create interactive quizzes for your student using the Quiz Station.

Fact Monster™: K-8th Grade

This site combines reference materials, facts, and trivia quizzes for kids on all subjects. Parents, educators, and kids can get homework help and access almanacs, an encyclopedia, a dictionary, and an atlas.

FAMILY FUN SITES

Multiplication.com: 2nd-6th Grade

Multiplication.com helps students review multiplication tables as well as addition and subtraction facts. It has interactive games, classroom games, and worksheets that can be downloaded.

Scholastic's The Stacks: 2nd-7th Grade

Scholastic's game page offers puzzles, games, and quizzes, but the first things you should check out are the writing games. These prompts are based on characters and themes from Scholastic books and encourage students to practice their creative writing skills.
